Objectives

I'm interested in short-term contract work for Site Building, Front End Development or Project Management of a complete project. I'd like to work with well-organized and professional companies who believe in carrying out work to a high standard and can provide clear channels of communication and support for assigned projects.

Skill Sets

JSP/JAVA, PHP, HTML, XHTML, CSS, JAVASCRIPT, SQL, CVS, SVN

Work Experience

Mar 1998 - Mar 1999 || Wax New Media Agency, London || Network & Systems / Web Developer

Worked with Network Engineer, installing systems and networks for clients, provided system support for clients, developed an interest in web and eventually moved over into web development department.

Project Portfolio: www.tetley.co.uk, www.mediarecruitment.co.uk, www.kpnuts.co.uk

Mar 1999 - Mar 2001 || Good Technology, London || Web Developer

Was responsible for developing, testing and deployment of web projects in accordance with brief handed over by project management. In-house projects were developed using JSP/Java. Coding was carried out to HTML 4.0 standards compliancy. Back end database work was carried out using MySQL or Oracle and CVS was used for all version control.

Project Portfolio: www.theoriginaltour.com, www.whitbread.com, www.premierlodge.co.uk

Oct 2001 - September 2003 || Good Technology, Barcelona || Technical Team Leader

In this new role I first started off working with projects after they had been handed over from project management. This later led to actually working alongside project management and collaborating on estimation of project timing plans and working out most efficient development process prior to each project being fully handed over to my team where I was then responsible for overseeing and coordinating the project and the development team. I was also the Lead Front End Developer for these projects.
